Amsterdam, The Netherlands; 12th January 2016 – AerData, the provider of lease management, records management and engine fleet planning software, announced today that Standard Chartered Aviation Finance, a division of Standard Chartered, has chosen AerData's STREAM Records Management System to support their fleet of over 100 aircraft.

STREAM (Secure Technical Records for Electronic Asset Management) is the industry's foremost web-based solution used by some of the world's largest airlines, lessors and MROs to manage aircraft and engine records.

Brian Tumulty, Executive Director, Technical, Standard Chartered Aviation Finance said, "A standardised approach to the management of aircraft technical information has become increasingly important in recent years. We are continually looking to improve our processes and become more efficient, especially around events like aircraft re-deliveries and trading. STREAM will give us the ability to manage, protect and share information on our assets with colleagues and partners around the world."

Commenting on the announcement, Mark Nieuwendijk, Managing Director of AerData said, "We are proud that the team at Standard Chartered Aviation Finance have chosen STREAM. It comes after a lengthy period of due diligence both on the product, our support and our best in class IT infrastructure. This new customer represents another major leasing organization that is now on-board with STREAM."

About AerData

AerData provides lease management, records management, engine fleet planning and audit and inspection software as well as technical and back office services for aircraft and engine operators, lessors and MROs. With a strong customer focus, AerData delivers a reliable and secure service to its clients using latest technologies and state of the art infrastructure.

AerData was acquired by The Boeing Company and became part of Boeing Commercial Aviation Services in May, 2014. These include parts, training, engineering, maintenance and software solutions that increase the efficiency and profitability of airlines and leasing companies.
