Amsterdam, The Netherlands; 23rd April 2015 – AerData, the provider of lease management, records management and engine fleet planning software, announced that Aergo Capital Limited has chosen AerData's STREAM and GEARS software to support technical records management and technical audit and inspection data management.

Sean Hedderman, Chief Technical Officer, Aergo Capital Limited, said, "At Aergo, we are seeking ways to aid the expansion of our business by growing our fleet." Hedderman continued, "AerData's products have proven themselves with many other lessors and we are excited to implement these software packages which will primarily assist the Technical group within Aergo. We are already using AerData's CMS lease management product so it was a logical decision to complement those capabilities with STREAM and GEARS."

"We are delighted to announce that one of our long-established CMS customers have chosen STREAM and GEARS," commented Mark Nieuwendijk, Managing Director of AerData. "GEARS, our latest platform to capture inspections and audit information, combined with the best in class records management capabilities of STREAM will certainly enable Aergo reach its business objectives."

STREAM (Secure Technical Records for Electronic Asset Management) is the industry's foremost web-based solution used by some of the world's largest airlines, lessors and MROs to manage aircraft and engine records.

GEARS (Global Electronic Asset Review System) is a total asset review management tool designed with in-field experience to ensure quality, consistency and efficiency in any asset review.

About AerData

AerData provides lease management, records management and engine fleet planning software, fleet and valuations data and technical and back office services for aircraft and engine operators, lessors and MROs. With a strong customer focus AerData delivers a reliable and secure service to its clients using latest technologies and state of the art infrastructure.

AerData was acquired by The Boeing Company and became part of Boeing Commercial Aviation Services in May, 2014. AerData products are now part of the integrated suite of aviation services marketed as the Boeing Edge. These include parts, training, engineering, maintenance and software solutions that increase the efficiency and profitability of airlines and leasing companies.

About Aergo Capital Limited

Aergo Capital is a long-established aircraft leasing company based in Dublin, Ireland. Its principal business is the acquisition and leasing of commercial jet aircraft to airlines on a worldwide basis.

The Company, which was acquired by the US-based global investment firm CarVal in 2014 has disposed of much of its older aircraft in 2013 and 2014 and is now actively rebuilding its fleet and expanding the range of aircraft in which it is investing.
