Amsterdam, The Netherlands; 18th February 2014 – AerData, the provider of software and services for the aviation industry announces that Engineering Holding, Russia's largest domestic MRO provider, is to acquire STREAM aircraft records software.

STREAM (Secure Technical Records for Electronic Asset Management) is the industry's foremost web-based solution used by some of the world's largest airlines, lessors and MROs to manage aircraft and engine records.

Commenting on the announcement, Mark Nieuwendijk, Managing Director of AerData said; "AerData have been working closely with Engineering Holding's team to take full advantage of the benefits that STREAM can bring. It's also our first customer in the rapidly expanding Russian airline and MRO market to implement the global standard in aircraft records on the STREAM platform."

Marat Tereshenko, General Director of S7 Engineering said; "We wish to adopt a global standard for managing records within our MRO customers. STREAM will integrate with our MRO IT system allowing full transparency on closed maintenance work, thereby increasing our quality and efficiency as we continue to grow our fleet and third party maintenance activity." He added; "We are pleased to be making this announcement with AerData, a company that has a history of supporting successful large scale implementations with major airlines."

About AerData

AerData provides lease management software, engine fleet planning software, records scanning software, fleet and valuations data and technical and backoffice services for aircraft and engine operators, lessors and MROs. With a strong customer focus AerData delivers a reliable and secure service to its clients using latest technologies and state of the art infrastructure.

About Engineering – the Aviation Maintenance Holding

Engineering Holding is the largest independent MRO provider in Russia and the CIS delivering maintenance services for the Western and Russian-built aircraft. Its heavy maintenance facilities are located in Moscow, Mineralnye Vody and Novosibirsk. The company's line maintenance station network is constantly expanding and currently consists of stations in Irkutsk, Krasnoyarsk and Vladivostok. The organization provides line maintenance services for more than 40 Russian airlines and more than 20 foreign operators. In 2013, the total maintenance works performed on Western and Russian-built aircraft exceeds two million man-hours. For more information, visit www.engineering-ru.com
