

PRESS RELEASE

Emirates selects AerData's STREAM records management solution

Amsterdam, The Netherlands; 21st August 2013 – AerData, the provider of software and services for the aviation industry announces that Emirates, the world's fastest growing international airline, is the latest airline to acquire STREAM records management solution. The contract term is for five years.

STREAM (Secure Technical Records for Electronic Asset Management) is the industry's foremost web-based solution used by some of the world's largest airlines, lessors and MROs to manage scanned aircraft and engine records.

Commenting on the announcement, Mark Nieuwendijk, Managing Director of AerData said; "We are proud that Emirates, a prestigious global airline, has chosen AerData to be a long term partner for its organization with STREAM. During the selection process, we emphasized our highly functional software, enabling the paperless airline processes."

About AerData

AerData provides records scanning software, engine fleet planning software, global fleet and valuations data, lease management software, and technical and backoffice services for aircraft and engine operators, lessors and MROs. With a strong customer focus AerData delivers reliable and secure services to its clients using latest technologies and state of the art infrastructure.

About Emirates

Emirates are a fast-growing international airline with one of the youngest fleets in the sky and more than 400 awards for excellence worldwide. With over 130 destinations, Emirates are the only airline in the world to offer non-stop service to all six continents from one hub.
