### **KLM UK Engineering Limited becomes launch MRO customer for AerData's STREAM digital aircraft records software**

Amsterdam, The Netherlands; 3 December 2012 - AerData B.V., the provider of software and services for the aviation industry announces that KLM UK Engineering Limited (KLMUKE), the UK-based MRO, has selected AerData's STREAM records scanning and indexing software solution.

Commenting on the announcement, Mark Nieuwendijk, Managing Director, AerData said; "We are delighted to announce that KLMUKE is our first MRO user of STREAM. STREAM is already well established in the airline and lessor community. The fact that an MRO such as KLMUKE is going to scan its maintenance records into STREAM further proves that STREAM is the only true aircraft records lifecycle solution giving benefits for all parties involved in operating, owning and maintaining aircraft."

Duncan Rae, Base Maintenance Manager at KLMUKE said; "We initially wanted to give our customers a method whereby they could view the progress of their maintenance immediately and in real time, by viewing closed work cards in an online system. STREAM provided this functionality along with the ability for the customer to check and approve or reject and make comments on the closed records, which we can then respond to and rectify if required. The system has been operational for 6 months and both we and our customers have benefitted from STREAM enormously."

Rae continued; "AerData worked very closely with us to integrate our IT system with STREAM, to provide us with the ability to generate customised reports from STREAM and to make system developments that make STREAM an integral part of our processes."

#### **About AerData B.V.**

AerData provides lease management software, engine fleet planning software, records scanning software, fleet and valuations data, technical and backoffice services for aircraft and engine operators, lessors and MROs. With a strong customer focus AerData delivers a reliable and secure service to its clients using latest technologies and state of the art infrastructure.

#### **About KLM UK Engineering Limited**

KLM UK Engineering Limited is a leading regional aircraft and narrow body MRO, wholly owned by KLM and member of the AFI KLM E&M Network. Services include base maintenance, line maintenance, component sales, technical training and decommissioning of Boeing 737's, Fokker 50/70/100 and BAe146/Avro RJ's.
