Amsterdam, The Netherlands; 10 October 2016 – AerData, a Boeing Company, announced today that HNA Aviation Group, has chosen AerData's Corporate Management System (CMS) to support their fleet of over 440 aircraft. CMS provides a single platform that will facilitate the consolidation and management of data from various sources enabling full control and oversight of asset value, maintenance reserve obligations, contract information and technical details.

AerData's Corporate Management System (CMS) is an industry leading platform that supports all business processes in aircraft leasing and asset management.

Vincent van der Gulik, Director Products and Services, AerData said, "We are delighted to welcome yet another airline customer into the CMS family. CMS will assist HNA to manage their fleet of assets that are currently operated in their portfolio, currently 14 airlines, using our best in class lease and asset management solution. We look forward to supporting them during their ambitious expansion plans with our scalable and future proof system."

## **About AerData**

AerData, a Boeing Company, provides lease management, records management, engine fleet planning and audit and inspection software as well as technical and back office services for aircraft and engine operators, lessors and MROs. With a strong customer focus, AerData delivers a reliable and secure service to its clients using latest technologies and state of the art infrastructure.

AerData was acquired by The Boeing Company and became part of Boeing Support and Services in May 2014. AerData is a Boeing subsidiary and part of the Digital Aviation business unit within Boeing Support and Services. Boeing offers the industry's largest portfolio of support and services solutions, providing customers a competitive advantage by solving real operational problems, enabling better decisions, maximizing efficiency and improving environmental performance – intelligent information solutions across the entire aviation ecosystem.
