

Total Back Office Support

AerData offers a complete range of ad hoc or continuous support services across all applications.

Lease Administration Services

Lease Administration Services consists of all aspects of population and maintenance of data on assets, purchases and lease agreements. The Lease Administration Services can provide additional capacity in the initial data loading during the implementation phase and can be contracted as a long term outsourcing of partial or full data entry and data maintenance on CMS.

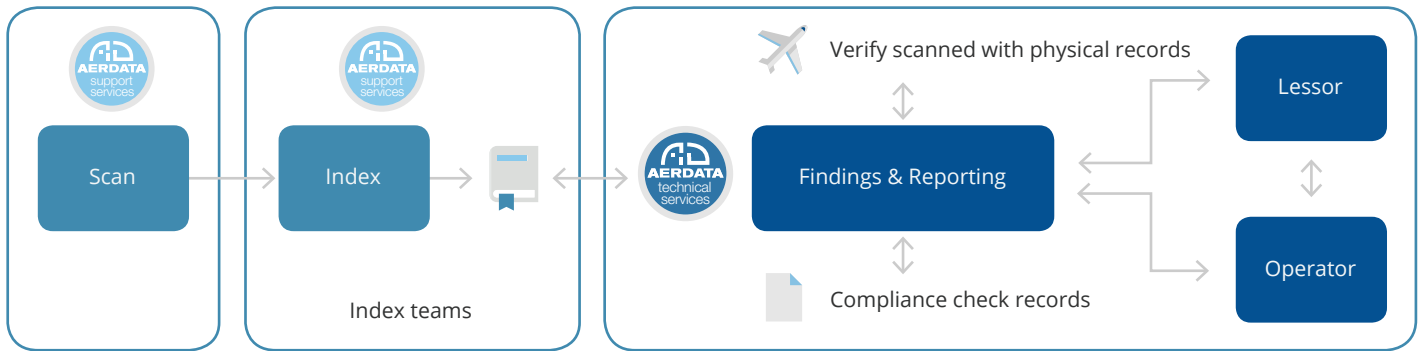

Our Lease Administration Services are here to support you in all aspects of lease management. Varying from one time asset populations such as lease agreements and rent/MR schedules up to monthly utilization entry and invoicing your customers on your behalf. The team is experienced with one time projects, such as portfolio acquisition entries as well as being a long term outsourcing partner for partial or full data entry and validation.

Records Scanning/Indexing Services

AerData scanning and indexing services has been developed since 2002 to be the most efficient process to capture and index aircraft records by using the latest in scanning equipment, sophisticated imaging software and experienced people.
