**AerData and Flatirons Solutions Announce
Agreement to Enable Paperless Airlines**

Amsterdam, The Netherlands; 9th December 2013 – AerData, the provider of software and services for the aviation industry, announces a new partnership with Flatirons Solutions (formerly InfoTrust Group), provider of the leading independent solution for technical information management for the aerospace industry.

The agreement will deliver airlines a world-class paperless maintenance environment through the integration of the electronic TechSight/X Job Card, Visit and Work Package solution with AerData's STREAM records management solution. The agreement paves the way for the elimination of paper from the aircraft service lifecycle.

Commenting on the announcement, Mark Nieuwendijk, Managing Director AerData said; *"We are delighted to announce this partnership with Flatirons Solutions, a leader in technical information management solutions for airlines. It will help our customers migrate to a unified paperless control environment that will eliminate significant cost burdens attributable to daily technical records management and airworthiness compliance as well as end of lease processes."*

"Flatirons Solutions is committed to helping the aerospace and aviation industry implement paperless solutions for aircraft maintenance," said JD Sillion, Chief Solutions Officer for Flatirons Solutions. "Teaming with AerData for electronic records management gives airlines and other aerospace organizations another advantage for controlling the costs of back-office processes so they can focus on doing what they do best, deliver superior passenger experiences and cargo on time."

About AerData
