

## **AerData to offer a full range of aircraft and engine technical services with the formation of ADTS.**

Amsterdam, The Netherlands; October 3rd, 2011 -AerData, the Amsterdam/Netherlands-based provider of software and services for aircraft and engine operators, lessors and MROs have announced today the formation of a new business unit called ADTS (AerData Technical Services).

ADTS will provide a wide range of services based on the renowned AerData software suite all delivered by a team of dedicated and experienced professionals. The unique business concept provides customers with a unique one stop shop approach to their asset management requirements – all designed to maximise asset value and minimise risk.

Commenting on the agreement, Paul van Tol, Managing Director of AerData said: “With the addition of ADTS to our service offering we are in a position to offer existing and new clients a complete package of software and services. Our software is already in use in over 80 organisations and by introducing hands on technical services that utilize the software, we can provide customers with seamless delivery of quality information from the asset through to the desktop.

Paul van Tol continues: “ADTS has already secured a program of technical inspections, has hired already several experienced individuals and will continue to grow from our offices in The Netherlands and the UK”.

### **About AerData**

AerData provides lease management software, engine fleet planning software, records scanning software, technical and backoffice services for aircraft and engine operators, lessors and MROs. With a strong customer focus AerData delivers a reliable and secure service to its clients using latest technologies and state of the art infrastructure.
